Class of 1983

*NEW YORK STATE  
COLLEGE  
OF VETERINARY  
MEDICINE

*It is difficult to think of two more different people than Dr. Fox and Dr. Harvey. Mere observation alone makes the differences obvious. One is short and thin, one is large and round. One is quiet, soft spoken and treats clients, students and patients all with the same gentleness. One is loud, gruff and belligerent with just about everyone.*

*Yet, outward appearances and unique characteristics aside, there is a common bond shared by these two men. Both Dr. Fox and Dr. Harvey care ... about teaching, about students, about the profession. In their own ways, with their own unforgettable styles, these two men have taught us about using our eyes, our ears, our hands and our hearts in our work. It is because of their concern and efforts on our behalf that we dedicate this yearbook to Dr. Francis Fox and Dr. Jay Harvey.*

Hobbies: Sailing, snorkeling, catching Florida lobster, fishing, wind-surfing, team sports, watercolor painting, photography, woodworking.

Advice: "Anything that doesn't kill you outright only makes you stronger." (as per Ken Marcella!), "It is better to set your goals high and learn failure than to set your goals low and learn disappointment."

R.W. Carls, Sr.

"There's a legend about a bird which sings just once in its life, more sweetly than any other creature on the face of the earth. From the moment it leaves the nest it searches for a thorn tree, and does not rest until it has found one. Then, singing among the savage branches, it impales itself upon the longest, sharpest, spine. And, dying, it rises above its own agony to outcarol the Lark and the Nightingale. One superlative song, existence the price. But the whole world stills to listen, and God in His Heaven smiles. For the best is only bought at the cost of great pain . . . or so says the legend."

From *The Thornbirds*, Colleen McCullough

## Evan R. Clark

 Special friends: Dinzo, Jack Jr., Old Blue

## *Kenneth L. Marcella*

Thanks to Mom, Dad, Jane and family — for understanding when you could and for loving when you could not understand.

If you care, and can remember,  
think of these days sometimes.  
Think of things we shared and learned,  
of loves and losses that marked our time,  
think hard of the person you were then.  
For we will never be this close again,  
and these were the best and oftentimes worst,  
the days we passed together.  
So my friends, take care, thank you.  
I will always carry a little bit  
of what we were.  
And the years themselves continue,  
days say farewell a million times.  
Each time forever.

## *Judith E. Marean*

Ithaca, N.Y.

"Jude"

Phrase: "Whoops."

Memorable Moments: Cowering in a feed bunk to avoid flying horse feet, and reclining in an unclean gutter after unsuccessfully avoiding a cow kick.

Plans: Mixed veterinary practice, many cows.

Advice: A veterinary education is greatly enhanced by backyard horse, donkey, goat, pig, duck, chicken, dog and cat farming.

## *Anne McComb*

Wassaic, N.Y.

Family: Curt, Andrea and Erin

Hobby: Riding

Favorite Quote: "Eighty percent of what you'll see in practice will get better, as long as you don't get in its way."

## Donna Marie Morshuk

Rochelle Park, NJ

"D", "Don-Don"

Phrases: "Everything works out for the best," "Live, Love, and Laugh," "There *are* some nice places in New Jersey!"

Memorable moments: Caribbean cruise, New Year's Eve down the shore, my first spay

Plans: To live a semi-normal life with Louie in a small animal practice somewhere warm, a new wardrobe, and enough money with enough time to enjoy it.

Special thanks to Mom & Dad, Louis, Elaine, Mike & Stash, Lorraine, and Faith for helping me make it through.

## Chris Murphy

Utica New York

Family: Flo, Ready Freddy, 6 brothers and sisters, Fritz, Ralph, and my favorite person and vet — Joanne.

If faced with doing what's expected (in the societal sense) or buying a memory for when you're 80 or impotent, the choice is clear.

Favorite times: Murph Mansion Extravanzas; Fear and loathing in Danby; cross country in the Adirondacks; Isle of Shouls blues; music with Andy and friends; raptor of the week; avian clinic; service with Horn; Depot rounds; Beppo goes to war; night skeet shooting and smelting with the Wombat; roach racing and "another night at the Lounge."

Goal: to run a natural history bookstore on the Coast.

Advice: Be forgiving; everyone's an ass now and then.

*The philosopher and bird of letters*

## Andrea Neiley

## Lee Walter

Footprints — One night a man had a dream. He dreamed he was walking along the beach with the LORD. Across the sky flashed scenes from his life. For each scene, he noticed two sets of footprints in the sand; one belonged to him, and the other to the LORD.

When the last scene of his life flashed before him, he looked back at the footprints in the sand. He noticed that many times along the path of his life there was only one set of footprints. He also noticed that it happened at the very lowest and saddest times of his life.

This really bothered him and he questioned the LORD about it. "LORD, you said that once I decided to follow you, you'd walk with me all the way. But I have noticed that during the most troublesome times in my life, there is only one set of footprints. I don't understand why when I needed you most you would leave me."

The LORD replied, "My precious, precious child, I love you and I would never leave you. During your times of trial and suffering, when you see only one set of footprints, it was then that I carried you."

Advice to underclassmen: For a long and fruitful life, 1) never take yourself seriously, 2) drink plenty of beer, and 3) go to bed early with your favorite classmate.

## Desiderata Veterinaria

Go placidly amid the crowded waiting room, and remember what peace there is in patience. As far as possible without surrender, be on good terms with all creditors. Speak your knowledge quietly and clearly and listen to your clients, even the dull and ignorant, for they have the true history. Avoid loud and aggressive persons; they rarely pay their bills. If you compare yourself with other surgeons, you may become vain and bitter; for always there will be greater and lesser orthopods than yourself. Enjoy your miracle cures, while remembering that misdiagnosis. Keep interested in your chosen career, whatever field that may be; it is a great

profession in these changing times. Exercise caution in your business affairs, for the world is full of quackery. But let this not blind you to what virtue there is; many persons strive for quality practice, and impart quiet heroism. Be yourself. Especially, do not feign false knowledge and experience; Neither be cynical about bad debts; they are perennial as the grass. Take kindly the counsel of the years, gracefully surrendering emergency duty to newly graduated youth. Nurture strength of malpractice insurance to shield you in sudden misfortune. But do not distress yourself with imaginings of performing midnight C-sections; many foals are born all

alone! Beyond a wholesome breakfast, be gentle with your employees. You are a Child of the Universe, no less than the cows and canaries; you have the privilege of treating them. And whether or not it is clear to you, no doubt your future is unfolding as it should. Therefore be at peace with God, whomever you conceive him to be; and whatever your labors and aspirations in the noisy treatment room of life, be at Peace with yourself. With all its down cows, late dinners and broken backs, it is still a beautiful life. Be careful. Strive to be better than before.

# QUICK QUIZ

## What should you look for first in a canine parvovirus vaccine?

### **Efficacy. Vaccine must protect against challenge.**

Titer levels may be considered a measure of efficacy, but challenge is the real test! 'Vanguard' efficacy studies\* showed 100% of vaccinated dogs protected against challenge that produced severe clinical signs in all unvaccinated dogs.

### **Duration. Vaccine must protect for more than a few weeks.**

In a test, Norden's MLV CPV parvovirus vaccine provided protection as long as 1 year after vaccination.\*

### **Safety. Vaccine must not cause reactions in patient.**

In an extensive 7-state field trial study, 1,800 doses of 'Vanguard' were administered with exceptional safety.

### **Immunogenic. Vaccine antigens must not be immunosuppressive.**

In Norden tests, no significant difference in the levels of serum antibodies was recorded between dogs vaccinated with Vanguard DA<sub>2</sub>PL + CPV and those given the same vaccine without the CPV antigen.

### **Convenience. Vaccine must not interfere with normal schedules.**

'Vanguard' is available as single antigen or in combinations to fit a variety of vaccination programs.

# YOUR FORAGE DESERVES THE BEST!

*The Technicon Auto Analyzer II™ determines % crude protein and available protein at 40 samples/hr with high accuracy.*

*The Perkin-Elmer Model 373™ atomic absorption spectrophotometer analyzes a full range of minerals. It performs up to 600 analyses/hr with extremely high accuracy.*

## The NY DHIC Forage Lab Provides the Best.

Maintaining optimum herd health and high productivity without costly over-feeding depends upon an accurate assessment of your forage quality. The NY DHIC Forage Lab is dedicated to providing the highest quality forage analysis and usable information about your forages.

**The Best Handling and Analysis.** At the NY DHIC Forage Lab your forage samples are given special handling. When received, samples are numbered and coded for specific analysis. They are carefully ground, accurately weighed and air dried (to prevent damage which can occur with other drying methods). These preliminary steps insure that your samples get a quality analysis.

### **The Best Technology.**

NY DHIC's modern technology assures you of precise analysis and data results. Forage is tested by studying the atomic or molecular characteristics through various spectrophotometric or wet-chemical techniques to determine the important constituents of each sample. There is no guesswork in NY DHIC forage analysis: results are

computer analyzed and provide accurate, useful data for your feeding program.

**The Best Quality.** The NY DHIC Forage Lab participates in a national check sample program. Continuous check sampling assures you of high quality. Each lab instrument is tested with a standard check sample and is frequently recalibrated to guarantee you genuine testing results and meaningful data.

**The Best Service.** Sulfur has been added as an optional test. Since sulfur is a major mineral ingredient in dairy cattle nutrition, we at NY DHIC offer you the opportunity to have your forage more fully analyzed, thus insuring you a more accurate ration.

Profitability in the modern dairy operation is often the result of an accurate and cost-conscious feeding program. With accurate and timely information about your forages through DHI forage analysis, you can make the decisions necessary for a balanced feeding program, higher productivity, and greater profitability.

*The Technicon Infra Analyzer 400 Plus™ is the most advanced instrument in the lab. It is used to analyze protein and acid detergent fiber for some types of samples.*

*The Sulfur Determinator insures a more complete forage analysis, therefore, helping you improve performance and profitability in your herd.*

## A Note from the Editor . . .

I never thought I'd see the day when I could finally sit down and thank all the people who helped create this yearbook. This book represents a lot of hard work from a lot of wonderful people. I want to thank them for all their time and energy and for putting up with all my nagging.

There are many people whose pictures are not on this page who helped with various aspects of this production, among them are — Ann Harris, Ann Marcham, Karen Redmond, Kathy Linn, Rich Barnwell, Faith Krausman, Sandy Bushmich, Sue Bokman, Liz Dibs, Giovanna Sorresso, Lenka Babuska, Jim Brown, Al Pomeranz, Jorge Sanchez and Renee Bayha.

I especially want to thank Dr. Lennart Krook for allowing us to use his darkroom facilities and Biomedical Communications for all of their technical assistance.
